PROFESSIONAL SUMMARY

Frontend Developer with 4 years of experience building scalable React.js, Next.js, TypeScript, and WebSDK solutions for enterprise FinTech and SaaS products. Strong expertise in WebSDK architecture, WebAuthn/Passkeys, REST API integration, security remediation, accessibility, reusable UI architecture, testing, CI/CD, Docker, and cloud deployments. Experienced in delivering production features across multi-tenant monorepos, authentication, card management, payment, CRM, analytics, and enterprise web applications.

TECHNICAL SKILLS & CORE COMPETENCIES

Frontend & Frameworks: React.js (18/19), TypeScript, JavaScript (ES6+), Next.js, HTML5, CSS3 / SCSS Modules, Tailwind CSS

State & UI Architecture: Redux Toolkit, Context API, InversifyJS (IoC/DI), TanStack Table, Micro-frontends, Turbo Monorepo, Visa Nova Design System

SDK Security & Standards: WebAuthn / FIDO2, Android CredentialManager, PostMessage API (Origin Hardening), Web Crypto API (ECDSA, AES-GCM), WCAG 2.2 AA / VPAT, Checkmarx SAST

DevOps, Build & Testing: Vite, Docker, Jenkins CI/CD, OpenShift / CloudView PaaS, Jest, React Testing Library, SonarQube, Git / GitHub

Backend & Integrations: RESTful APIs, Axios, [Node.js](#), IndexedDB

PROFESSIONAL EXPERIENCE

Viyansys Solutions

Chennai, Tamil Nadu

Senior Software Engineer

Sep 2024 – Present

VOBO WebSDK — Embedded Identity & Card-Management Platform | Apr 2026 – Present

Client: Visa Inc. | Product: Visa On-Behalf-Of (VOBO) WebSDK

- Owned the WebSDK frontend architecture of a multi-tenant monorepo, enabling issuer banks to embed Visa-hosted identity, card-management, and wallet journeys via themed WebViews without bank-side development.
- Designed and implemented native-bridge passkey architecture, moving FIDO2/WebAuthn credential registration and assertion from in-page JS to a native bridge contract integrating Android CredentialManager with typed error handling.
- Integrated SDK against live backend services, resolving live API contract mismatches and verifying end-to-end functionality with a 190+ automated test suite and full TypeScript compilation.
- Spearheaded UI modernization adopting Visa Nova Design System across dashboard mini-apps; created shared visa-card-art package eliminating duplicated rendering logic.
- Diagnosed and fixed cross-iframe/WebView embedding defects, maintaining the bridge contract of record for partner mobile engineering teams.

Flex Web SDK — Device Management & Authentication Platform | Jun 2025 – Present

Client: Visa Inc. | Product: Flex (DMS, Authentication & Card Lifecycle)

- Served as primary author (546 of 597 commits), architecting the Flex Web SDK from ground up and leading migration to a VMCP microservices architecture and complete Nova design system UI overhaul.
- Delivered core end-to-end features: B2C IAM integration with live APIs, intuitive spend control rules engine with drag-and-drop priority ordering, onboarding flows, and multi-bank card management.

- Owned application security remediation: resolved Checkmarx SAST and Dependabot findings, eliminated DOM XSS via postMessage, hardened CSP headers, and secured reverse-proxy layers.
- Drove the SDK to WCAG 2.2 AA / VGAR Level 5 accessibility certification, authoring the VPAT and ACR compliance documentation.
- Configured CI/CD pipelines and multi-environment deployment on Docker + CloudView PaaS, engineering environment-aware routing and automated Jenkins/OpenShift builds.

Click to Pay (C2P) Client — Card Enrollment Portal | Jan 2025 – Jun 2025

Client: Visa Inc. | Product: Visa Click to Pay (CTP)

- Developed and maintained a high-performance React 19 + Vite SPA for Click to Pay card enrollment, supporting Single Enrollment, Batch Enrollment, and Enrollment Status operational workflows.
- Built reusable, accessible UI components utilizing React Router and Context API for modular state management.
- Implemented pixel-accurate UI implementations matching Figma specifications and resolved critical functional defects identified during QA cycles.

Remediated security vulnerabilities including log-forging sanitization and clickjacking frame-busting logic; localized web font hosting to remove external CDN dependencies.

Maxco System

Junior Software Engineer

Coimbatore, Tamil Nadu

Jun 2023 – Aug 2024

Enterprise CRM & Sales Operations Platform | Dec 2023 – Nov 2024

Client: Internal Enterprise Product

- Architected and developed key modules of an enterprise B2B CRM application in React.js and TypeScript, managing sales lead lifecycles, account directories, deal pipelines, and revenue analytics for 500+ active enterprise users.
- Engineered an interactive Kanban board with drag-and-drop deal stage transitions and optimistic state updates using Redux Toolkit, boosting sales team deal tracking velocity by 30%.
- Built high-performance data tables with virtualized scrolling, server-side pagination, multi-column sorting, and advanced filter queries using TanStack Table, seamlessly rendering 50,000+ contact records.
- Developed executive sales reporting dashboards integrating role-based access control (RBAC).

Marathon & Event Management Platform | Jun 2023 – Dec 2023

Client: Coimbatore Marathon | Product: Event Registration & Race Operations System

- Built end-to-end responsive user and administrative portals in React with TypeScript, supporting event browsing, runner category selection, and organizer administration for 10,000+ marathon participants.
- Integrated Razorpay payment gateway for online fee collection, implementing end-to-end checkout flow, order generation, cryptographic payment signature verification, and webhook reconciliation.
- Developed organizer dashboards to monitor participant rosters, bib number assignments, payment settlement statuses, and dynamic race analytics in real time.
- Designed reusable form, table, and modal UI components with comprehensive client-side validation, decreasing registration submission errors by 35%.

EDUCATION

Bachelor of Engineering (B.E.) — Electrical and Electronics Engineering

2019 – 2023

M. Kumarasamy College of Engineering, Karur, Tamil Nadu
